

I have just recently purchased Satellite Radio because my 2 favorite DJ's were fired for, what Clear Channel called, unprofessional conduct. This was ridiculous. So I choice Satellite Radio so that no one could control what, when, where, how or whom I listened to. Now you say that the National Association of Broadcasters wants to take that same control. I think this is bull shit. I pay for these services and no one, I mean NO ONE should have any control but ME.
